Referral	85	16	7.06	18.82

RECOMMENDATIONS
1. Compare conversion rate and bounce rate across traffic sources.
2. Review landing pages with relatively high bounce rates.
3. Investigate device differences before prioritizing design changes.
4. Improve registration flow if many sessions do not complete registration.
5. Use campaign-level results to guide further testing.

Note: Funnel stages are session counts. Verify tracking definitions before interpreting them as unique users.
